Claims 1-6 and 8-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The terms "alkyl", "cyanoalkyl", "hydroxyalkyl", "alkylene-cycloalkyl", "alkylene-substituted cycloalkyl", "substituted alkyl", "aryl", "substituted aryl", "heteroaryl", "substituted heteroaryl", "alkylene", "alkoxyalkoxy", "cycloalkyl", "substituted alkyl", "substituted oxygen", "substituted nitrogen" and "substituted phenyl" lack enablement in that substituents have not been set forth and the above terms have not been limited to any number of carbon atoms. Said terms include such a large number of possible substituents that it would take an undue amount of experimentation to determine which specific substituents will result in a compound having the desired activity. In view of the high unpredictability of the efficacy of various pharmaceutical derivatives there is a good reason to doubt that a compound substituted by methyl will have similar activity or property as a compound substituted by an alkyl group having 100 carbon atoms. Further, note that such terminology as "substituted oxygen" reads on all compounds containing oxygen such as polysaccharides, macrocyclics, heterocyclics, etc. The specification fails to provide any teaching guidance or guidance on how to choose specific substituents which will result in a compound having the desired property and activity.

Art Unit: 1623

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite in that the markush group for the variable R9 contains the term "alkoxyalkoxy" twice.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-23 of copending Application No. 10/777,455. Although the conflicting claims are not identical, they are not patentably distinct from each other because the compounds claimed in the instant application are encompassed by the compounds claimed in the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
